

Appointment Booking System – React JS (Simple Lab Exam Project)

Project Idea

A simple clinic appointment booking system where users can: Book appointments View appointments Delete appointments

Step 1: Create React Project

```
Open terminal:

npx create-react-app appointment-system

Move into folder:

cd appointment-system

Start project:

npm start
```

Step 2: Open src/App.js

Replace full code with this:

```
import React, { useState } from "react";
import "./App.css";

function App() {
  const [name, setName] = useState("");
  const [doctor, setDoctor] = useState("");
  const [date, setDate] = useState("");

  const [appointments, setAppointments] = useState([]);

  const bookAppointment = () => {
    if (name && doctor && date) {
      const newAppointment = {
        id: Date.now(),
        name,
        doctor,
        date,
      };

      setAppointments([...appointments, newAppointment]);

      setName("");
      setDoctor("");
      setDate("");
    } else {
      alert("Fill all fields");
    }
  };

  const deleteAppointment = (id) => {
    setAppointments(
      appointments.filter((appointment) => appointment.id !== id)
    );
  };

  return (
    <div className="container">
      <h1>Appointment Booking System</h1>

      <input
        type="text"
        placeholder="Patient Name"
      />
    </div>
  );
}
```

```

      value={name}
      onChange={(e) => setName(e.target.value)}
    />

    <input
      type="text"
      placeholder="Doctor Name"
      value={doctor}
      onChange={(e) => setDoctor(e.target.value)}
    />

    <input
      type="date"
      value={date}
      onChange={(e) => setDate(e.target.value)}
    />

    <button onClick={bookAppointment}>Book Appointment</button>

    <h2>Appointments</h2>

    {appointments.map((appointment) => (
      <div key={appointment.id} className="card">
        <p><b>Patient:</b> {appointment.name}</p>
        <p><b>Doctor:</b> {appointment.doctor}</p>
        <p><b>Date:</b> {appointment.date}</p>

        <button onClick={() => deleteAppointment(appointment.id)}>
          Delete
        </button>
      </div>
    ))}
  </div>
);
}

export default App;

```

Step 3: Open src/App.css

Replace with this code:

```

.container {
  width: 400px;
  margin: auto;
  text-align: center;
  font-family: Arial;
}

input {
  width: 90%;
  padding: 10px;
  margin: 10px;
}

button {
  padding: 10px 20px;
  background-color: blue;
  color: white;
  border: none;
  cursor: pointer;
}

.card {
  border: 1px solid gray;
  padding: 10px;
  margin-top: 10px;
}

```

Step 4: Run the Project

```
npm start
```

Output Features Book Appointment Display Appointment List Delete Appointment Simple UI using React JS

Technologies Used React JS CSS JavaScript **Concepts Used** useState() Event Handling Array Mapping Form Handling

Short Lab Exam Explanation

“This project is a simple appointment booking system developed using React JS. Users can enter patient name, doctor name, and appointment date. The appointment details are stored using React state and displayed on the screen. Users can also delete appointments.”
